

SEPES GRANADA 2012
42 REUNIÓN ANUAL 11-13 OCTUBRE

DR. MASSIMO FUZZI

SÁBADO 13

SALA MANUEL DE FALLA

"The Interdisciplinary approach to the prosthetic rehabilitations".

The goal of current prosthetic therapy combines the best prosthetic result in terms of esthetic, form and function with the least invasive operative approach. The opportunity provided by the utilization of therapeutic solutions derived by other disciplines (Ortho, Perio, Implant and Adhesive Dentistry) will be discussed, in light of recent literature, and exemplified in a resulting well organized treatment plan. The pros and cons of different options will be considered and analyzed.
